## **DETAILED ACTION**

This action is in response to the amendment filed on December 18, 2008.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is rejected, because there is no support for the memory.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 3-18, 22-26, and 28-30 are rejected, because there is no support in the specification for a memory.

The previous rejection has been withdrawn.

### ***Claim Rejections - 35 USC § 101***

The previous rejections have been withdrawn.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1, 3-18, 22-26, and 28-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Risafi (6,473,500) in view of Rosen (6,868,408), as set forth in the previous Office Action.

#### ***Response to Arguments***

Applicant's arguments filed December 18, 2008 have been fully considered but they are not persuasive. In response, to the Applicant's argument that there is no prima facie case of obviousness, the Examiner recognizes that references cannot be arbitrarily combined and that there must be some reason why one skilled in the art would be motivated to make the proposed combination of the primary and secondary references.

*In re Nomiya*, 184 USPQ 607 (CCPA 1975). However, there is no requirement that a motivation to make the modification be expressly articulated. The test for combining references is what the combination of disclosures taken as a whole would suggest to one of ordinary skill in the art. *In re McLaughlin*, 170 USPQ 209 (SSPA 1971).

References are evaluated by those versed in the art, rather than by their specific disclosures. *In re Bozek*, 163 USPQ 545 (CCPA) 1969. In this case, Risafi discloses using a loaded card to making electronic money transactions. Rosen teaches

performing money transactions electronically. Both references are analogous art; therefore, the Examiner found that it would have been obvious to combine them.

The Applicant argues that neither reference discloses or teaches an exchange provider, a first value provider, a second value provider, converting the received value with the processor of the exchange provider to the converted form in accordance with the determined exchange provider. In response, Risafi teaches an exchange provider (the user may use the card to make purchases and the value is transferred from the card by the exchange provider --col.4, lines 5-15 and col.14, lines 38-55; see also Applicant's specification para.17), a first value provider (value provided on card for making transactions--col.4, lines 5-15 and col.14, lines 38-55), a second value provider (value when first value is transferred to account of another when conducting transaction (col.14 lines 38-55), converting the received value with the processor of the exchange provider to the converted form in accordance with the determined exchange provider (when the user initiates a transfer with the card, a first value is transferred from the card into a second value; the second value may be the same type as the first value—col.14, lines 38-55; see also Applicant's specification para.17). Rosen teaches different exchange values (col.3, line 35 to col.4, line 35). Therefore, the Examiner is interpreting the references as reading onto the invention substantially as claimed.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
